

GARDENS OF DUBROVNIK RIVIERA

We would like to take you to family countryside homes, to show you the way our hosts live for generations and to feel their hospitality.

In the charming village of Orašac take part in the production of olive oil the old fashioned way, where the «mill» is driven by a horse. Here you will also have the opportunity to taste some home made cheese, smoked ham and wine.

Throughout history Majkovi have been the centre of bee-keeping in Dubrovnik region. We will visit the house of honey, enjoy honey tasting and learn about this delicious and rare type of food that is being produced by the bees, without industrial processing and additives.

Trsteno botanical garden is jewel of renaissance and baroque architecture of noble families in ancient Dubrovnik.
