

VJETRENICA CAVE

Vjetrenica is the largest and most important cave in Bosnia and Herzegovina, and one of the most important caves in the Dinaric Alps mountain range, which is famous worldwide for its karstic and speleological riches. Vjetrenica is the richest cave in the world in terms of subterranean biodiversity: among more than two hundred different species are registered in it, almost hundred are troglophiles, a great number of them are narrow endemic, 15 are stenoendemic, and about 37 were discovered and described in Vjetrenica for the first time.

Do not miss an opportunity to explore mistique underworld of Hercegovina karst!
