ROLE LOCATION	LEAF Academy		
DEPARTMENT	STEM department	REPORTS TO	Area Leader
ROLE N DETAILS			
Challenge to address/ROLE PURPOSE (why ROLE exists?)	About the school: LEAF Academy is an international boarding high school located in Bratislava, Slovakia. The Academy opened its doors in 2016. The currently serves 100 students and has 30 full-time staffulty (staff and faculty) with plans to grow enrollment every year. LEAF Academy is part of LEAF, a non-profit organization with multiple programs to develop young people with the potential to be the shapers in the region. LEAF Academy is one of the few full-boarding schools in the Central Europe region and was designed with the intent to create a strong boarding culture where learning often happens outside the classroom. As a school that promotes innovation and change, we are not interested in simply replicating concepts from well-established boarding schools. (Re)thinking what we do and how we do it is an essential and ongoing feature of our culture.		
	LEAF Academy is rooted in the values of entrepreneurial leadership, excellence, ethics, and civic engagement. Students are admitted to a 2 or 4-year program. We aspire to be a community of learners where students and staffulty work and learn together while having fun. The Academy offers a rigorous and innovative academic program using the AP curriculum in combination with experiential learning opportunities and courses such as entrepreneurial leadership, character development, STEM, and Central European studies. The Academy's approach to learning emphasizes the development of skills and competencies over the mastery of content and promotes 'real world' connection. This focus is not just declared; the school has been designed to focus on these areas. LEAF Academy aspires to be one of the most entrepreneurial schools in the world. This means a lot of opportunities to make things happen; it also means a lot of ambiguity.		
	LEAF Academy graduates go in many directions: from attending some of the best universities in the world to taking a gap year to gain job experience.		
	LEAF Academy's academic buildings are located in the heart of Bratislava and the residence, which houses all students and 16 staffulty is located a half-hour walk away. Bratislava which serves as an extension of the campus is located in the center of other regional capitals with Vienna, Budapest, and Prague under a few hours away.		
LEAF Academy is currently undergoing accreditation from NEASC using the ACE Learning scheme for international schools.			

DUTIES AND RESPONSIBILITIES	<p>This is an opportunity to help build a world-class innovative science curriculum. LEAF Academy is looking for an experienced Science Teacher who can teach Chemistry, Science (primarily Physics) and/or AP Calculus.
